SQL terraform

1. File Structure:
   - You've broken down a large, single file into multiple smaller files for better organization.
   - sql.tf contains about 90% of SQL-related resources.
   - main.tf contains dependencies and core infrastructure components ie resources related to authentication and users.
2. Secrets Management:
   - Some secrets don't have a clear place in the current structure.
   - They are currently being created in the main.tf file.
